

Mapping of the Capability Maturity Model

The release of any new or revised **Capability Maturity Model**[®] has always been accompanied with the questions "What does this mean to me?" and "How does this compare with what I am already doing with regard to an existing model?" Mappings of the Capability Maturity Model for Software (SW-CMMSM) Version 1.1 to and from the **Capability Maturity Model Integration**SM for Systems Engineering/Software Engineering/Integrated Product & Process Development (CMMI-SE/SW/IPPDSM) Version 1.1 are available on the Software Technology Support Center (STSC) Web site at www.stsc.hill.af.mil. The STSC performed this mapping.
