

# We Are Your Partner for Dynamic Solutions

Aligning software technologies and processes with your organization's strategy, infrastructure, and personnel gives you an advantage in today's environment of tight budgets, information overload, and changing customer requirements.

We provide knowledge, experience, and results for government organizations in:

- Capability Maturity Model® and Capability Maturity Model Integration™
- Configuration Management
- Documentation and Standards
- Independent Expert Program Reviews
- Independent Verification and Validation
- Interim Profiles and CMM® Appraisals
- Object-Oriented Adoption, Transition, and Migration
- Personal Software Process™ or Team Software Process™
- Process Definition
- Programming Language Support
- Project Management
- Requirements Engineering and Management
- Risk Management
- Software Acquisition
- Software Cost Estimation
- Software Measurement
- Software Process Improvement
- Software Quality, Inspection, and Test
- Strategic and Action Planning
- Theory of Constraints
